

Maintenance Hole Fall Prevention System

Meets OSHA Requirements

1926.502(b)(11)

1926.502(b)(13)

Whether you refer to them as access covers, sewer covers, manhole covers, hatch covers, or utility access points, once uncovered OSHA calls these hazards by just one name. They are all classified as holes under OSHA 1926.501(b)(4). The Garlock Safety Systems Maintenance Hole fall prevention system provides a fully OSHA compliant system to protect workers from this danger.

Compliance Assured

There are many types of maintenance hole products that are typically designed to mark or highlight this type of hazard. Garlock Safety System's Maintenance Hole protection solution goes far beyond that. It is third party approved to assure you have a true and fully OSHA compliant fall prevention solution in place.

Fast and Easy Set Up

Virtually anyone can set up the system ensuring compliance in as little as 15 minutes. Set the four bases on the ground, place the adjustable retaining legs over the base posts, slip in the rails and pin in place. It couldn't be easier to set up and take down for short term or long term work.

Why Choose Garlock Safety Systems™?
