ARIA, light up your work!

PETZL.COM

ARIA is the new range of ultra-compact Petzl headlamps. Available in four models, they provide professionals in the generalist, trade, or industrial markets alike, everything they want and expect in a lamp.

Waterproof (IP67), durable (IK07), and fall resistant up to 2 meters, ARIA headlamps are designed for professionals who need a tool that's tough. At Petzl, we're always working to create the best tools for our users, so these lamps are lightweight (just over 100 grams), cast 350 to 600 lumens, and are compatible with standard batteries, as well as the rechargeable CORE battery, with the HYBRID CONCEPT.

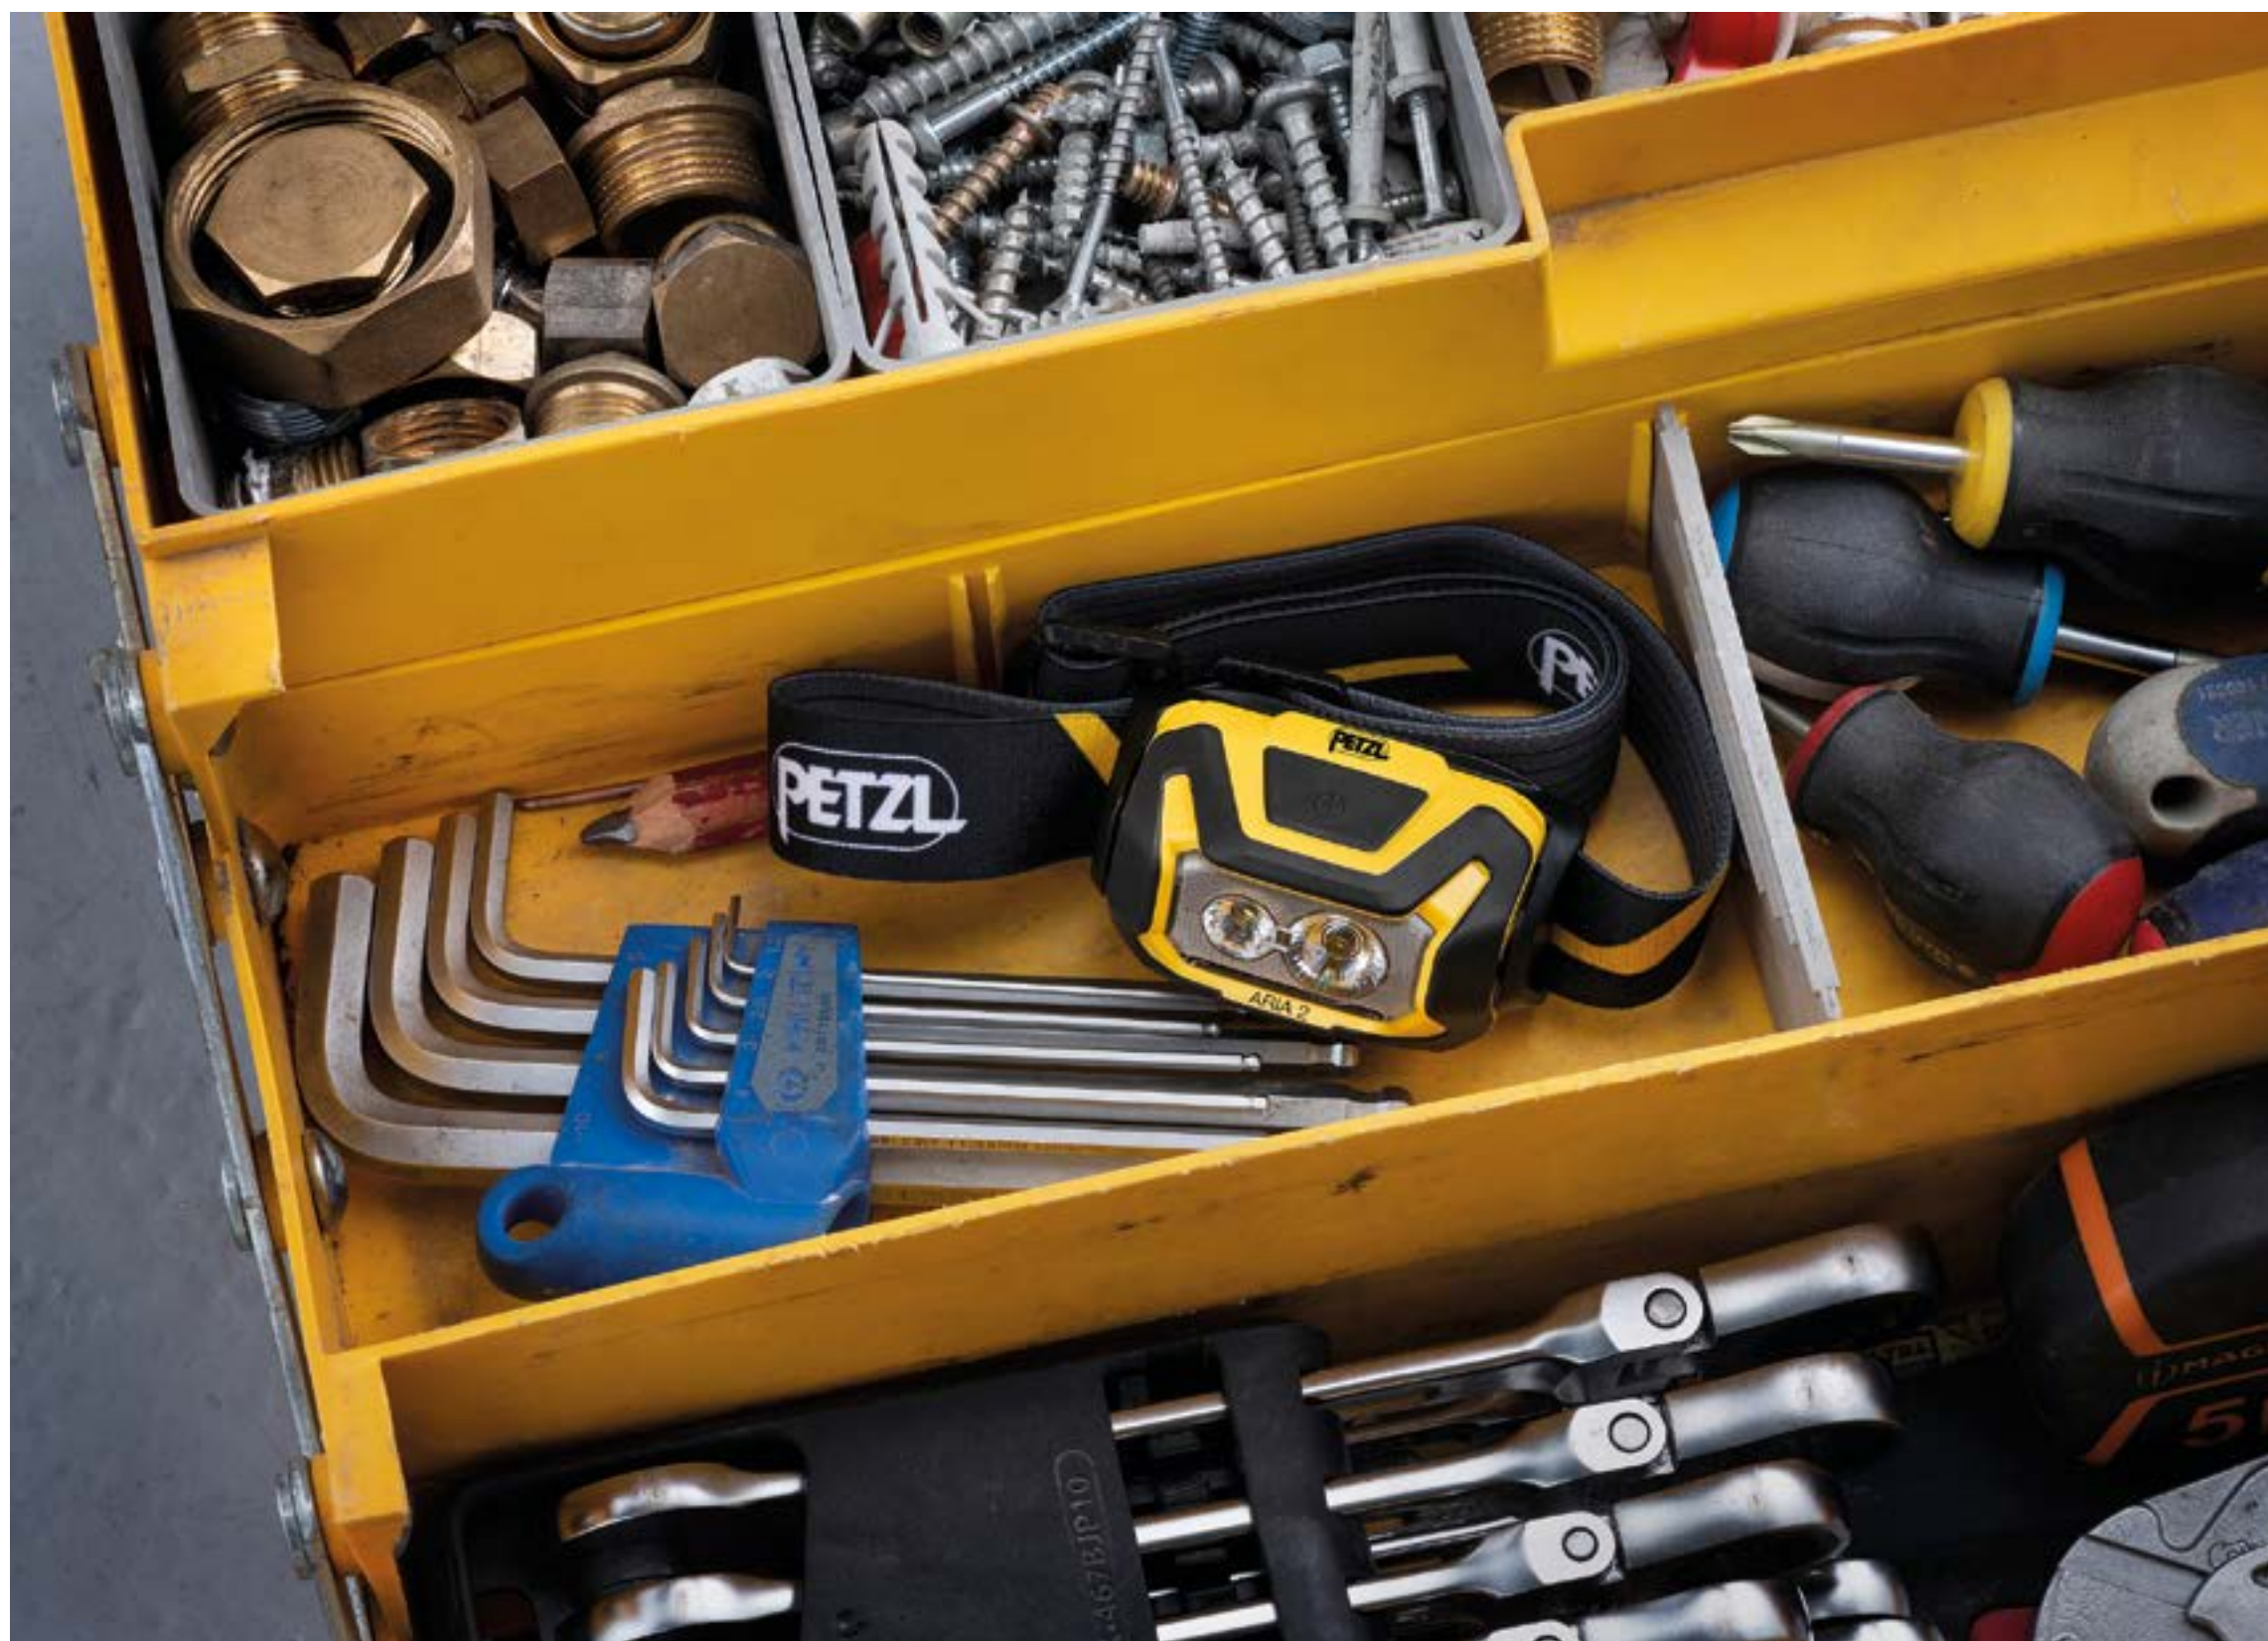

With ARIA, Petzl is providing hands-free lighting that is simple yet effective, for all professionals that want to light up their work.

Ultra-Compact and Versatile Headlamps

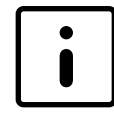

PETZL.COM

- **Ultra-compact**

Ultra-compact, ARIA headlamps can be easily stored in a toolbox.

PETZL.COM

- **Waterproof and durable**

IP 67

IK 07

2m

ARIA headlamps are designed to meet the needs of professionals: waterproof (IP67), impact resistant (IK07), and fall resistant up to 2 meters.

Ultra-Compact and Versatile Headlamps

PETZL.COM

- **Easy to use**

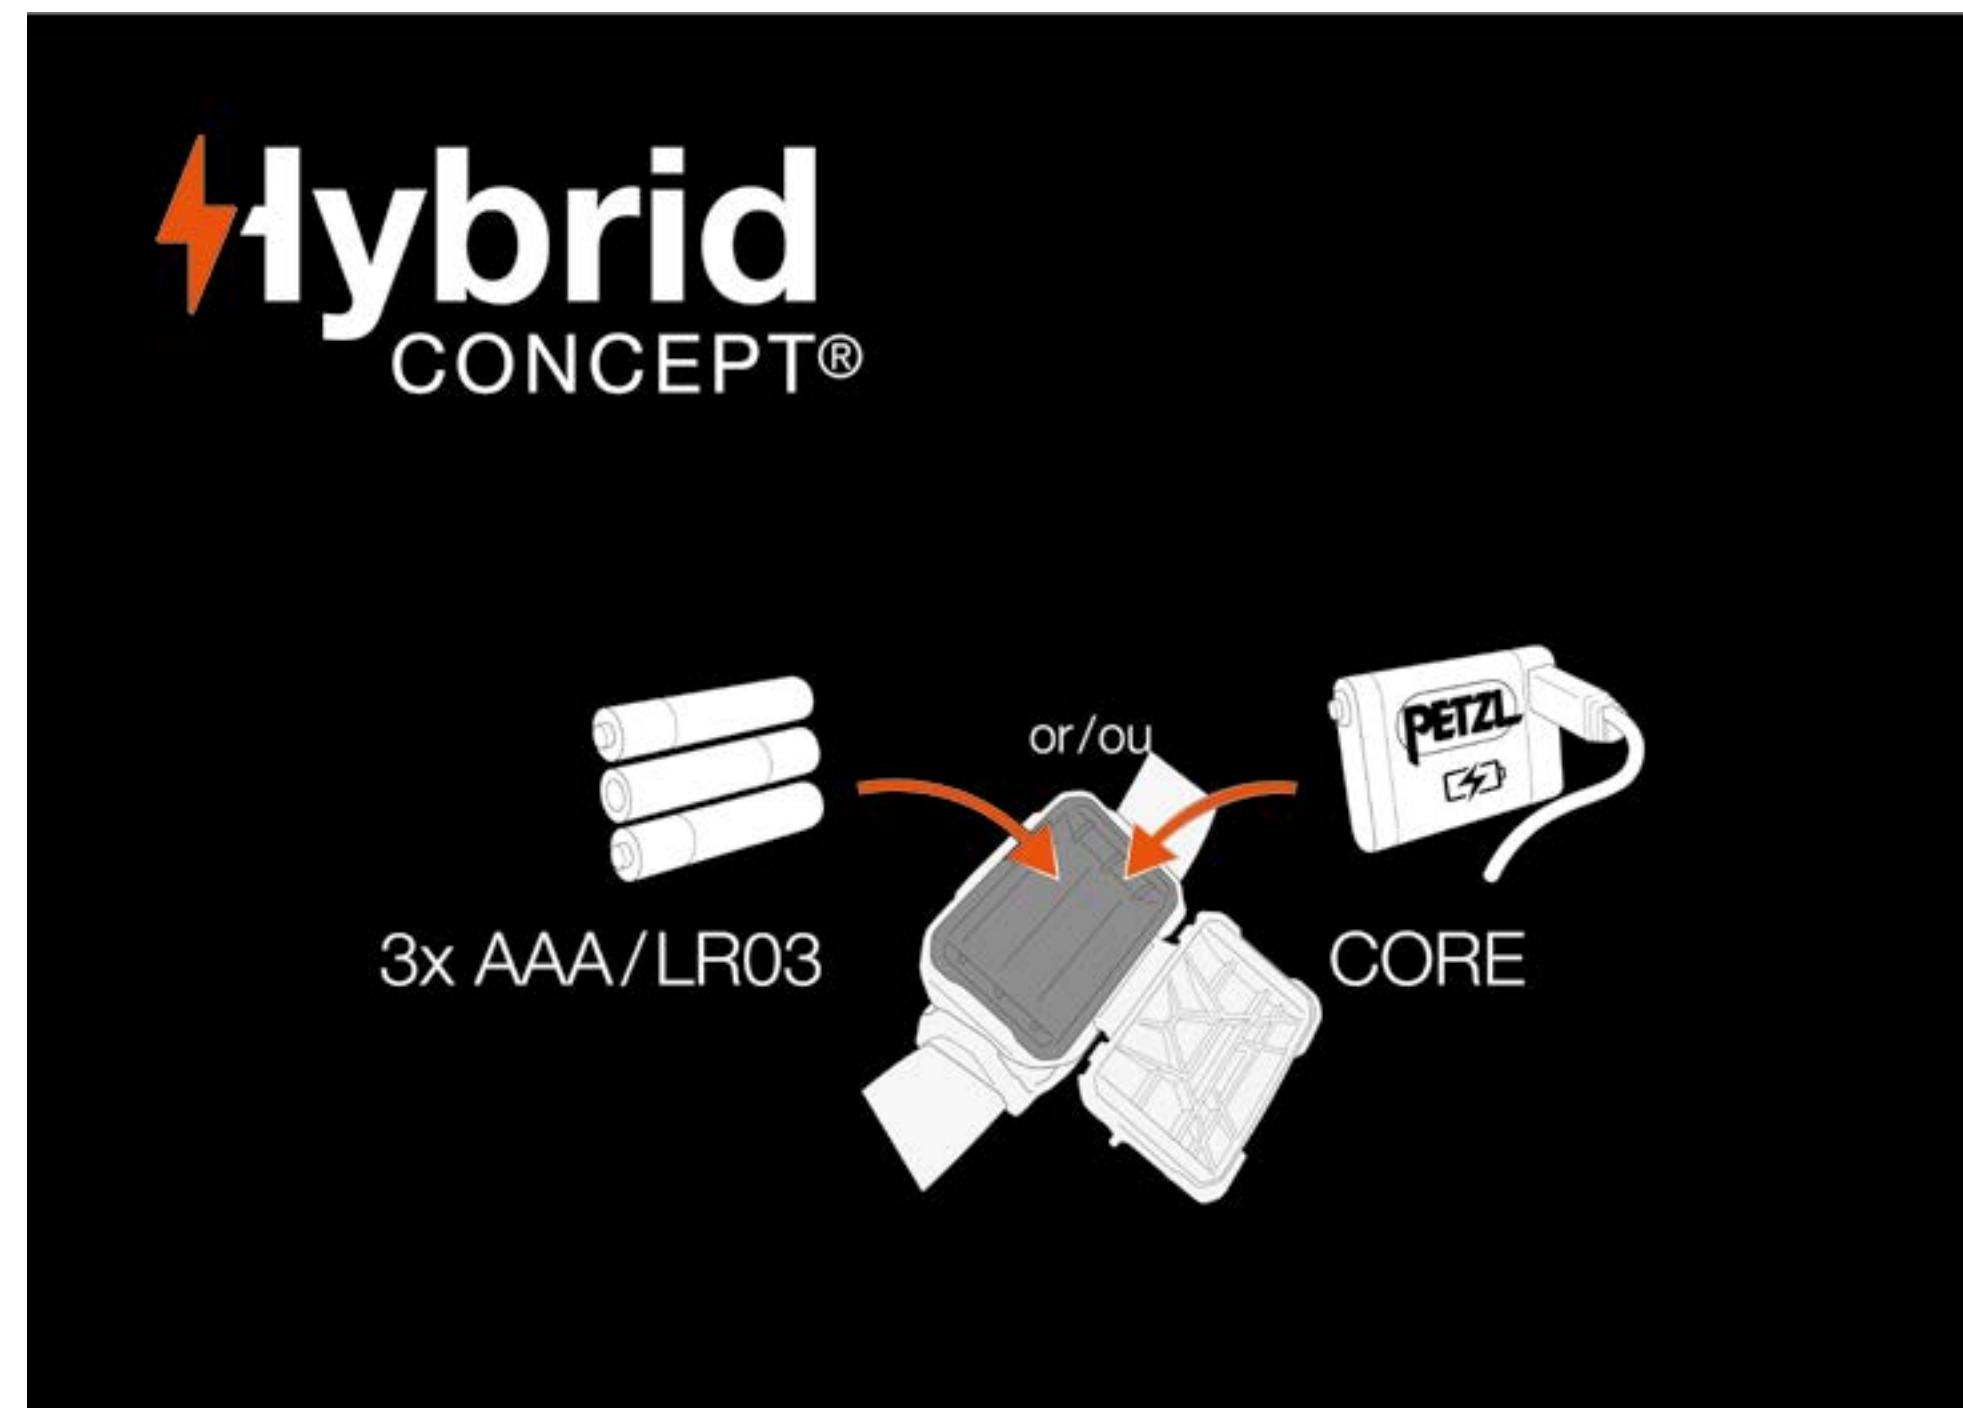

The single button on ARIA headlamps allows you to access every lamp function: on/off, lighting levels, lighting colors (black version only), lock, battery level.

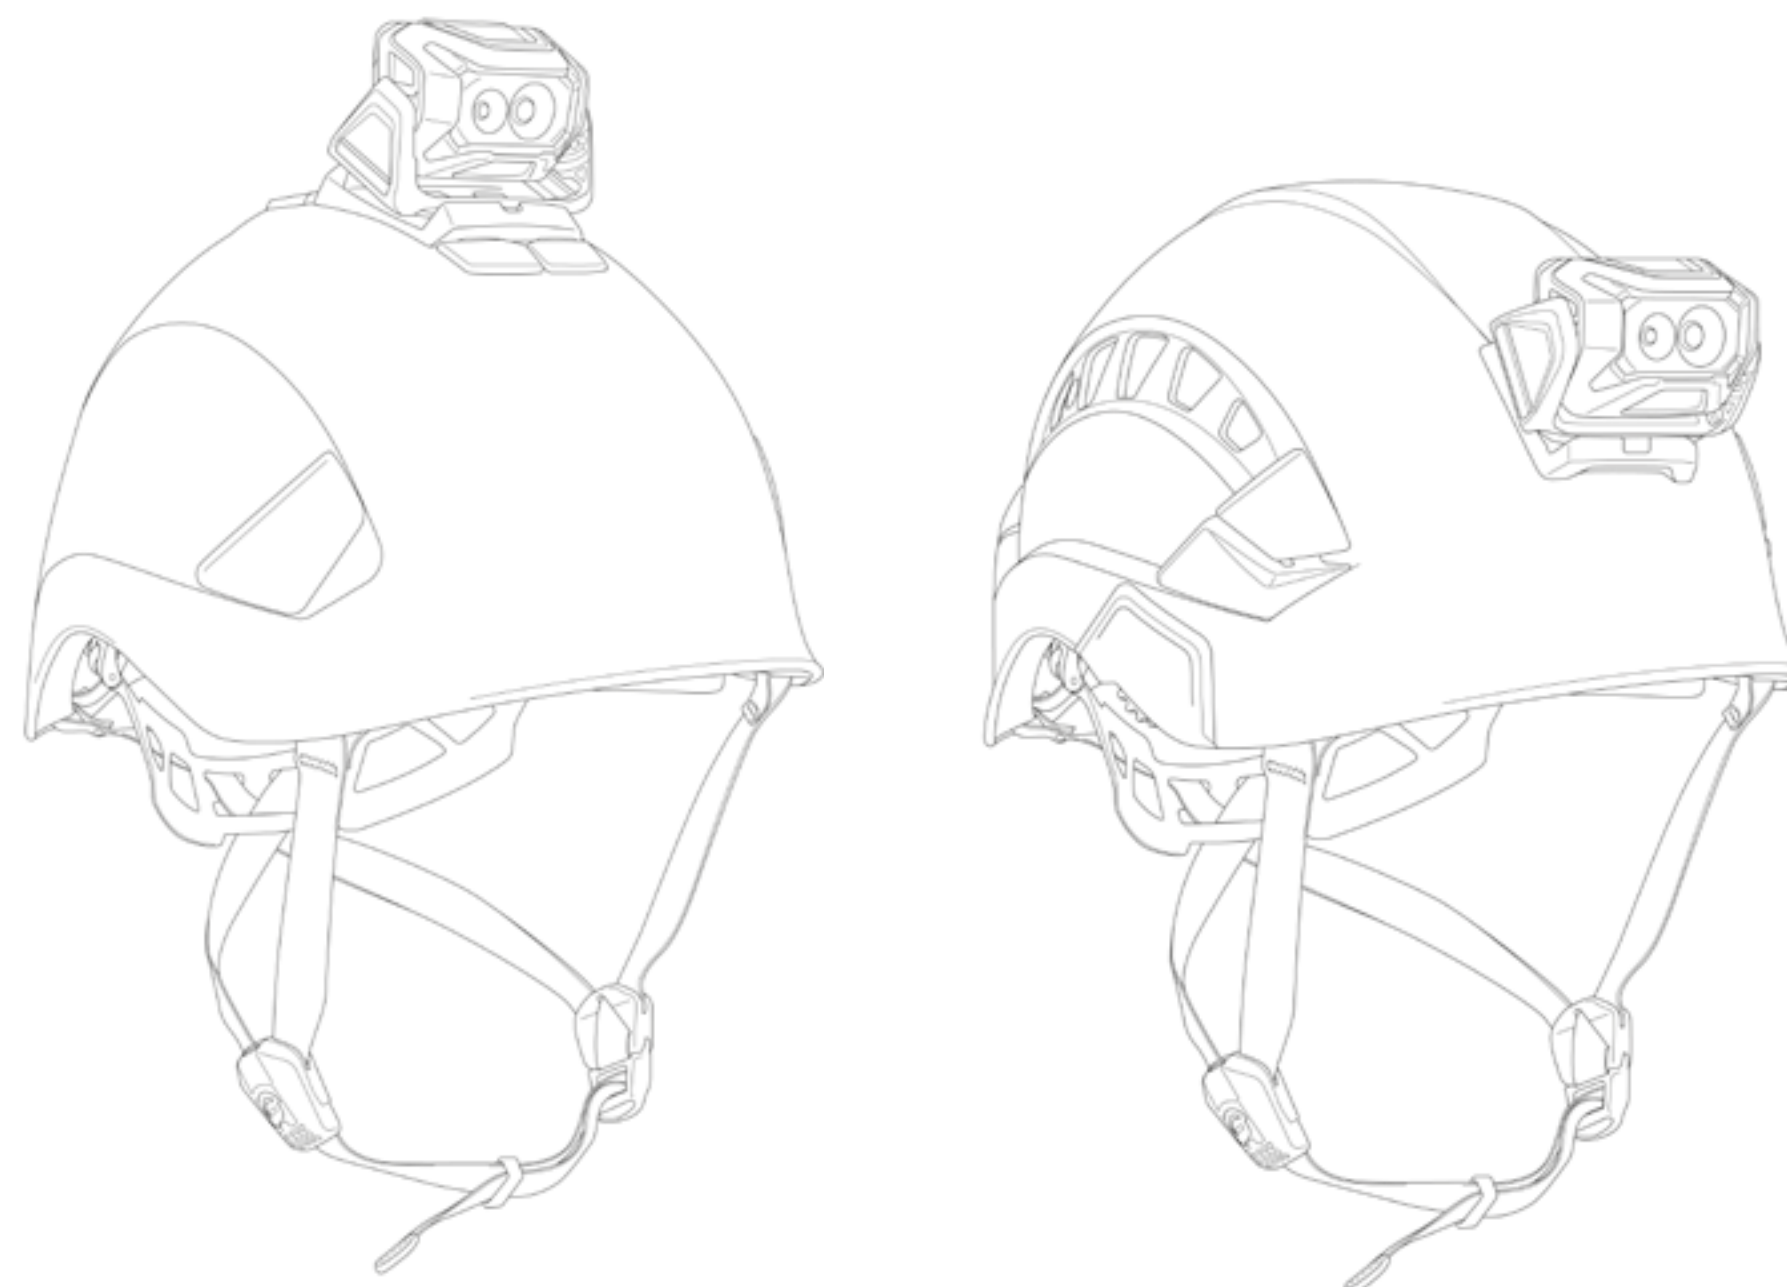

PETZL.COM

• Practical

The HYBRID CONCEPT design allows the headlamps to function with standard AAA/LR03 batteries or with a CORE rechargeable battery. The headlamp automatically detects the energy source and optimizes lighting performance. With a rechargeable CORE battery, the lamp provides more brightness when it is turned on and throughout the duration of use.

The headband allows ARIA headlamps to be worn on the head or around the neck. They can also be mounted on a helmet, with mounts available as accessories: HELMET ADAPT (compatible with a variety of helmet types) and SLOT ADAPT (for helmets with compatible slots).
