

Portable Davit Confined Space System

FrenchCreek's Portable Davit System is used to raise, lower, and suspend personnel performing routine work duties or to facilitate rescues in vertical confined space applications such as vaults, manholes, and pump stations. The variable offset mast can be equipped with FrenchCreek's mechanical work-winch and rescue SRL. The lightweight aluminum alloy design and quick-connect/release pins, allow for easy setup, dismantle, and transport.

- ☑ Davit base width adjusts from 36"-60", fits a wide range of openings
- ☑ Davit arm adjusts from 12"-30" offset reach to keep lifelines centered
- ☑ 3 piece base includes integrated bullseye level & tool-free adjustment
- ☑ Davit meets OSHA 1926.502 and 1910.66 regulations

Davit System Components

PD1 Davit Mast Assembly

- Telescoping adjustability from 12" to 30"
- Primary and secondary pulleys for multiple devices
- Attachment points for mechanical devices
- Swiveling design allows easy hole exit & rescue
- Lightweight powder coated aluminum & alloy steel

R50G 3-Way Rescue SRL

- Requires **PD3 mounting bracket** for Davit System
- 50' galvanized wire rope lifeline
- Dual internal inertia braking system
- Load indicating snaphook included
- Available in stainless steel & Technora® rope

MW50G Material Work Winch

- Requires **PD4 mounting bracket** for Davit System
- 50' galvanized wire rope
- Friction braking system
- Available in stainless steel & Technora® rope
- Rugged, steel frame drum

PD3 & PD4 Mounting Brackets

- PD3 mounting bracket for R50G
- PD4 mounting bracket for MW50G

PD2 Davit System Base

- Base width adjusts from 36"-60"
- Integrated bullseye level
- Tool-free height adjustment
- Compatible with davit mast assembly
- Lightweight powder coated aluminum & alloy steel
