

Ultra-IBC Berm®

Dual containment system provides outstanding protection for IBCs

- + Inner spill pallet contains smaller spills (up to 85 gallons) and elevates intermediate bulk containers (IBCs), tanks and totes for easy dispensing.
- + Outer berm captures catastrophic spills or projectile leaks (up to 400 gallons).
- + System can be quickly and easily set up without forklifts or other handling equipment or tools.
- + Economical alternative to IBC spill pallets.
- + Polyethylene (pallet) and 22 oz. PVC (berm) construction stands up to rigors found onsite - provides excellent chemical compatibility.
- + **Meets SPCC and EPA Container Storage Regulations 40 CFR 264.175.**

IBCs can be loaded/unloaded without breaking down berm sidewalls.

| Part# | Dimensions in. (mm) | Load Capacity lbs. (kg) | Containment Capacity gal. (L) | Weight lbs. (kg) |
|-------|--|-------------------------|-------------------------------|------------------|
| 0816 | 72 x 72 x 18 (1,828.8 x 1,828.8 x 457.2) | 6,500 (2,948.4) | 400 (1,514.2) | 136 (61.7) |
