

ISLE

HOW TO: Set Up Your ISLE Inflatable Paddle Board in Less Than 10 Minutes

Unpack the contents of your iSUP backpack and unroll your deflated paddle board to get started.

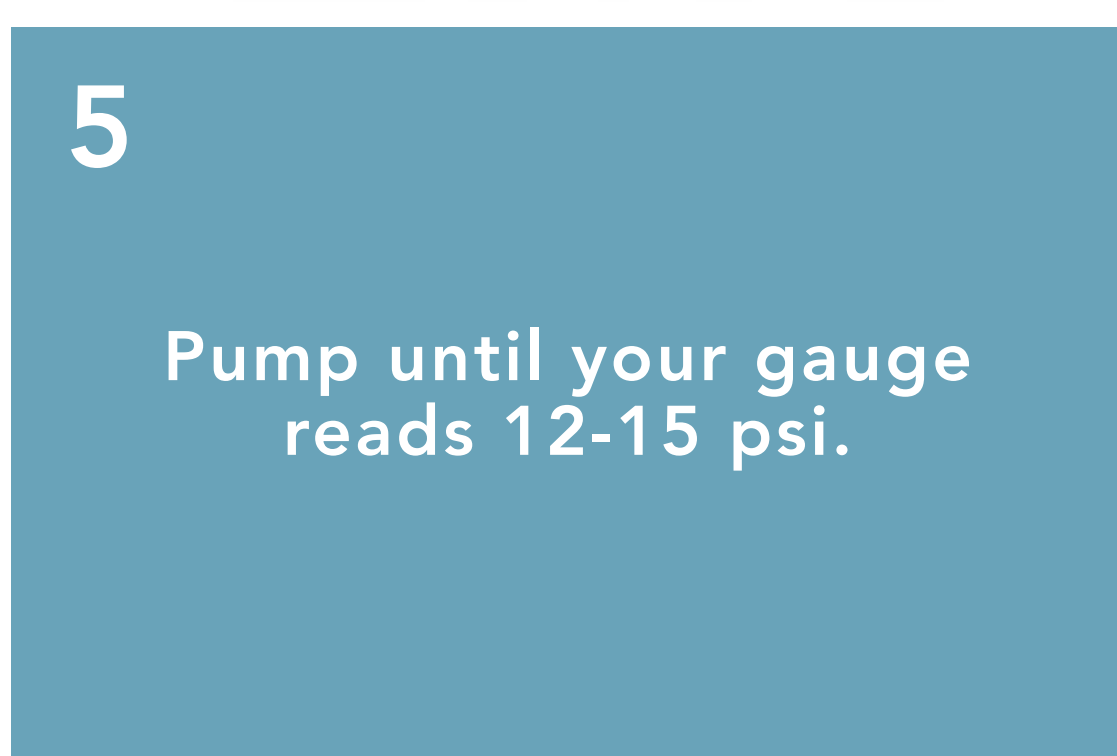

Twist inflation valve pin into upright position.

Insert hose into inflation valve and twist clockwise to connect.

Attach hose to hand pump and push feet into ground.

Pump until your gauge reads 12-15 psi.

Secure cap on inflation valve.

Once the board is fully inflated, flip it over to attach the fin.

Start by placing superbolt into the fin box, thread end upward

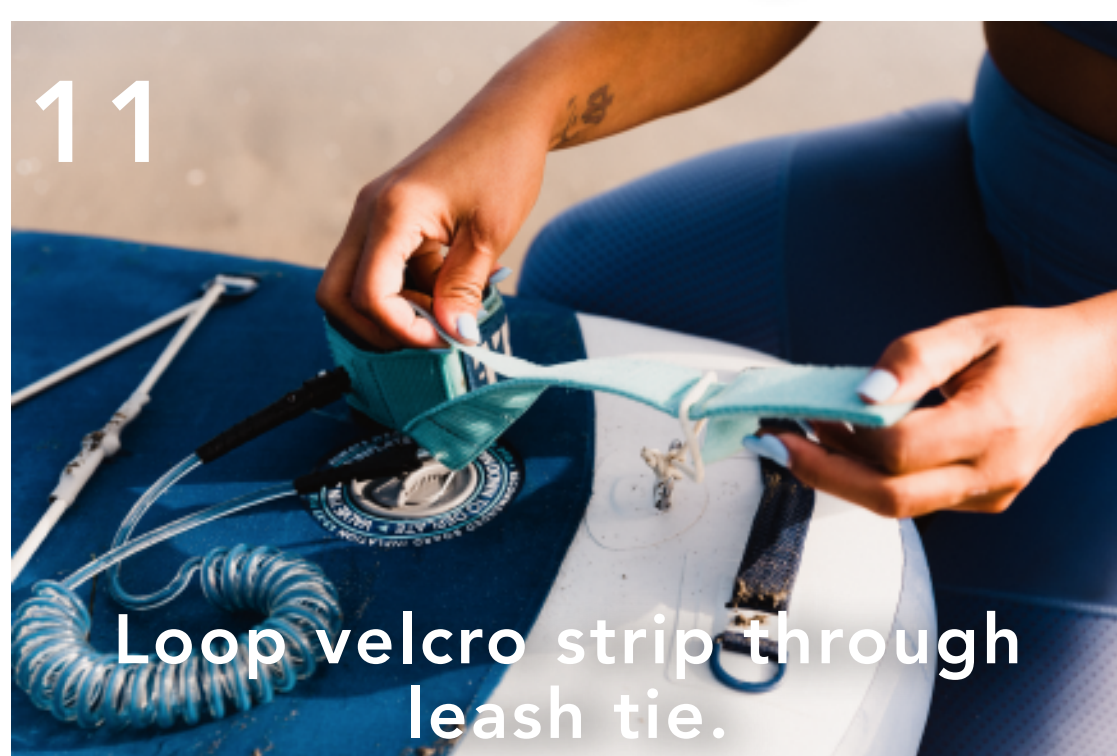

Fit fin into box, aligning hole with superbolt.

Fasten nut to superbolt to secure fin in place.

Start attaching leash by looping tie through d-ring.

Loop velcro strip through leash tie.

Paddle boarding offers one of the most accessible, immediate, and direct paths to achieving a healthier, calmer, and more fulfilling life. Enjoy the ride.
