## Data sheet

### STAND UP

This flexible loop ascender can be particularly well adjusted to the size of the user, especially for very large people. The second hand, which is not operating a rope clamp like the GET-UP during ascent, fits perfectly in the integrated handle. With the very large ascender foot opening, feet find solid hold quickly and safely. It can also be used for lifting persons.

- Flexible adjustment options
- Integrated handle allows two-handed ascent
- Large foot loop opening
