

# Visual Warning Lines

Everlast™ 300 • Everlast 200 • Folding • Sentinel Cone and Base™

**Meets OSHA Requirements**

1926.502(f) (2)

## Everlast 300

A permanent warning system with heavy-duty RailGuard™ 200 metal bases, plastic-coated cable, and your choice of plastic or metal pennants. Everlast visual warning lines utilize plastic-coated cable with standard high-density plastic pennants. The heavy-duty stanchions and RailGuard 200 metal bases withstand years of use. The standard system includes (3) stanchions, (3) Bases, and 100 ft. of cable with plastic flags.

- Permanent warning line system used for visual warning of at-risk areas
- Uses RailGuard 200 metal bases bases, steel cable, and metal or plastic pennants

**Metal Flags**

Optional for long life

**Base and Stanchion**

Add for more stability

## Everlast 200

This permanent warning line system utilizes the cost effective Set and Prevent base to create a high value 100' warning line system. Form fitting rubber pads and its non-penetrating design maintains the watertight integrity and warranty of the roof. Flags are constructed of hard safety yellow flags spaced at 6' for durability and meet OSHA standards.

- Kit includes three bases and pads
- You choice of safety yellow or zinc plated stanchions
- 100' of flags on a coated steel cable
- Pins to mount stanchions to the bases

**Set and Prevent base**

Cost Effective and durable

**Flags on coated steel cable**

Meet OSHA standard

## Why Choose Garlock Safety Systems™?

- Rigorously Tested to Exceed OSHA & ANSI Standards
- Full Passive Fall Prevention Portfolio
- In-House Engineering
- Custom Engineered Products Available

Coming Soon	Everlast 100	4 each Sentinel Rubber	30 lbs.	None, rubber base	4 each aluminum	1 each, 100', vinyl	Yes	Yes

## Sentinel Cone and Base

An economical and easy to deploy system for roofing and construction projects on roofs or at ground level. Third party OSHA certification is achieved with its 30 pound recycled rubber skid resistant base, 47" overall cone height and 39" flag tie off height.

## Application Consideration

Warning line kits are sold to accommodate the most popular application, connecting multiple warning lines together. Kits do not include the final stanchion to use all 100 feet of the warning line. The last segment of warning line is to be connected the stanchion of the next warning line kit.

To create a single 100' segment of warning line or to end a run, purchase one additional base and stanchion separately.

## Folding

Create a safe-zone using the Garlock folding warning line system. Heavy-duty folding stanchions and 100 ft of vinyl flags set up quickly. Typical installation for warning lines requires lines to be placed a minimum of 6ft. from hazard for construction applications. (See your individual state OSHA regulations for compliance.)

- Premium folding warning line system used for visual warning of at-risk areas
- Standard system includes four folding bases and 100 feet of flags

## Cart

Optional store up to 9 folding warning lines and 300ft of warning line, lockable

## Rubber Feet

Optional rubber feet for use on metal decks
