

LED Lighting & Saguaro Flower Manual

Included

- 12V low voltage spotlight, 3 watts/ea.
- 2 wire nuts/light for Saguario installation
- Saguario flower cluster/circle plate

Needed

- Low voltage transformer (minimum 50 watts required)

1 Pull wire out of Saguario arm(s).

2 Cut wire and strip back black insulation and join the wires back together.

3 Splice in the light with wire nuts (included)

4 Bend down skinny tab on bottom of circle/flower plate and run through hole in light bracket.

5 Bend down tabs on outer rings of flower cluster or circle plate. These tabs slide under the lip of the arm.

6 Pull wire out of bottom of saguaro and hook to a 12v low voltage transformer.
