

How Long Can My Dog Wear the K9 Mask® Using an Air Filter?

- We recommend using each air filter up to four hours. However, depending on large particle air conditions, moisture levels, or excessive dirt in the filter it might be necessary to replace the air filter sooner.
- Prolonged use can affect a dog's natural ability to cool itself through panting especially at temperatures of 80°(F) 26°(C) or higher. This mask is intended to be used for a short duration and under close supervision. Be cautious using for more than **10 minutes** at a time. After **10 minutes** you may remove the mask for several minutes to check the breathing and panting of your dog then continue wearing the K9 Mask®.
- Always visually monitor your dog while wearing the K9 Mask®. If you notice labored breathing or signs of overheating remove the mask immediately. This mask may cause injury or death to your dog. Consult your veterinarian about the health of your dog before using this air filter product.
